

Newsletter archive

Show your newsletters, dynamically loaded from your nuevoMailer installation, in any website with 3 lines of code.

SET-UP

In the <head> part of the page where you want to show the archive add the following <script> block (see example in newsletters.html):

```
<script language="JavaScript" type="text/javascript">  
  var url="http://www.yourdomain.com/mailer/";  
  document.write('<script type="text/javascript" src="'+url+'admin/scripts/newsletter.js"></script>');  
</script>
```

Replace the **yellow part** with your own actual URL to your nuevoMailer installation.

The following line loads a drop-down menu for selecting a newsletter:

```
<div id="menuDiv" style="margin-top:30px"></div>
```

And this line loads the newsletter you select with the menu.

```
<div id="holderDiv"></div>
```

The page newsletters.html serves as example. You can use any other page.

Note 1: Only newsletters that are marked as **public** appear in the archive.

Note 2: For cross-domain requests open these two files in the subscriber folder (*api_nslMenu.php*, *newsletter.php*) and activate the line that defines the external domain. You will see comments at the top of each file.
